

What is lightning?

1a. In pairs look at the, ‘word cloud’; with your partner put the words into noun + noun collocations. Check your answers with your teacher.

●

e.g. *Shock wave*

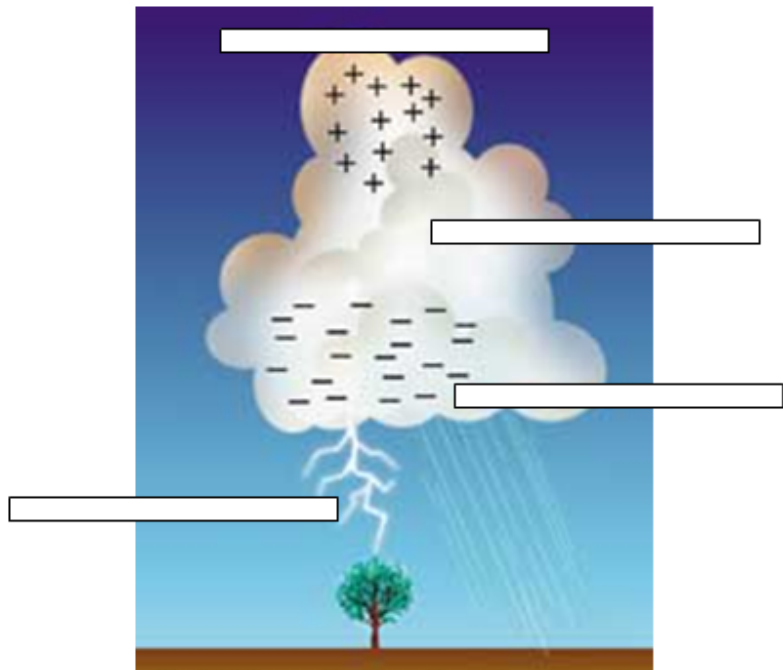

•

•

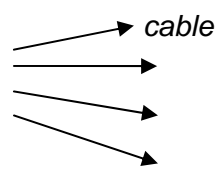

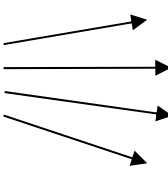

•

b. Work in pairs. What do you notice about the stress pattern? Is the first or second noun in the collocation stressed? Listen to your teacher and mark the stressed syllable as shown in the example.

c. Work in pairs and label the diagram using three of the collocations.

2. Make more collocations with the words **electricity** and **cloud**. Check on the website <http://collocations.ooz.ie/p/collocations.html> or use a dictionary to help you. Make a sentence with four of the new collocations.

<p>electricity</p> 	<p>cloud</p> 
---	--

E.g. *The electricity cable wasn't long enough.*

- _____
- _____
- _____
- _____

3. Work in pairs to match the four different types of lightning to the pictures.

Intra cloud lightning		Cloud to ground lightning	
Ground to cloud lightning		Cloud to cloud lightning
